EXTENSIVE HANDS-ON!

Learn It.

A unique blend of sound clinical principles with 'Monday Morning' business principles that simply make sense.

Do It.

Each course features extensive hands-on software exercises for a complete learning experience.

Experience It.

Each implant workshop will feature a patient demonstration to solidify the lecture and hands-on components.

MEET YOUR FEATURED INSTRUCTOR

Tarun Agarwal, DDS

Dr. Agarwal maintains a full-time general practice in Raleigh, NC. While he has completed extensive continuing education dental leaders and the various institutes, his most impactful learning has been from the school of hard knocks. His energy, passion, and unique practice approach has made him a nationally recognized lecturer and seminar leader.

“**My promise to you** — everything taught at the workshops are based on experience from everyday practice and my personal journey in 3D digital dentistry. I live in the same world you do. I face the same challenges you do. I am a practice owner and full-time practicing dentist. You'll love the down to earth atmosphere and practical approach to 3D digital dentistry!”

MEET THE INSTRUCTORS

Dr. Uday Reebye

Uday Reebye, owner of Triangle Implant Center in Durham, NC, is a full time practicing Oral & Maxillofacial Surgeon. He believes in an 'inclusive' team approach to implant dentistry - one that encourages general dentists to fully immerse into implant dentistry. He looks forward to helping you reach your potential.

Dr. Benjamin Nemec

Benjamin Nemec, owner of Hills Dental Spa in Austin, TX, is a full time practicing general dentist and CEREC trainer. He has built a successful practice by focusing on maximizing the capabilities of CEREC. He looks forward to sharing his expertise and expanding your capabilities and enjoyment of CEREC.

Mr. Hootan Shahidi

Hootan Shahidi is an expert medical biller focusing exclusively on dentistry. His experience as an office manager and as owner of a medical billing company that has helped hundreds of dental practices, gives him unique insight into what it takes to successfully implement medical billing in your office. He looks forward to helping you and your team.

3-DAY INTENSIVE HANDS-ON WORKSHOP

LIVE PATIENT
DEMONSTRATION

Ultimate 3D

3D Implementation & CEREC Integration

WITH DR. TARUN AGARWAL

Are you ready to put into place the most efficient workflow in implant dentistry?

This three day intensive hands-on workshop is specifically geared towards the Galileos/XG3D owner with CEREC technology. The goal is efficient, predictable, and profitable results without clinical compromise.

Through an ideal combination of lecture, extensive hands-on exercises, and patient demonstration, you will gain an advanced understanding of the 3D implant workflow. Detailed attention is given to the three phases of the workflow - planning, placement, and restoration. **You will leave this workshop with confidence and understand:**

1. Seven critical steps for virtual planning
2. Surgical guide selection and workflow
3. CEREC in the Implant Practice
4. Fundamentals of Anterior Implants
5. When immediate placement is indicated
6. Powerful payment technique that works
7. Increasing case acceptance

This course is right for you if:

- You want a clear, concise workflow that produces efficient, excellent results
- You want to maximize the potential of your 3D implant practice
- You want to dramatically reduce the learning curve with 3D imaging

**THIS WORKSHOP
WILL DRAMATICALLY
TRANSFORM YOUR 3D
IMPLANT PRACTICE!**

IMPLEMENT 3D IMPLANT DENTISTRY MONDAY MORNING!

Leave this workshop with the education, experience,
and confidence on topics including:

3D Implant Workflow

Step by step details on creating the most efficient workflow specific to 3D

Surgical Guides

Learn surgical guides for every indication — from single to fully edentulous.

Advanced Virtual Planning

Learn a systematic approach to anteriors, immediates and complex cases.

CEREC Guide 2

Learn the who, what, when, why, where, and how of CEREC Guide 2. We make it simple and predictable.

Single Visit Abutment Crown

Step-by-step fabrication technique of the screw retained abutment crown in a single visit.

Practice Management

Learn the fundamental business principles that will help grow your implant practice.

2-DAY INTENSIVE HANDS-ON WORKSHOP

LIVE PATIENT
DEMONSTRATION

3D Edentulous

Computer Assisted Digital Implant Therapy

WITH DR. UDAY REEBYE & DR. TARUN AGARWAL

Are you ready to take your implant dentistry to the pinnacle?

This intense two day workshop is geared towards the experienced implant clinician looking to fine tune or develop a digital protocol for fixed hybrid implant cases.

Through a unique collaboration of a restorative dentist, oral surgeon and dental laboratory, you will learn a step-by-step protocol for the fixed hybrid prosthesis. Detailed attention will be given to the four phases of treatment — diagnosis, surgery, prosthetic conversion and final prosthetics. **You'll leave this workshop with confidence and understand:**

1. The four critical patient factors you must identify to ensure success
2. Developing proper aesthetics and occlusion to guide surgery
3. Virtual planning keys to determine case feasibility
4. Restoratively driven guided surgery and workflow
5. Utilizing a team approach for improved patient care
6. Predictable technique for immediate load full arch provisionals
7. Creating efficiencies and case profitability

This course is right for you if:

- You want to systemize your approach to full arch hybrid implant cases
- You want to learn a technique that is on the cutting edge of implant dentistry
- You want to achieve a predictable, profitable process that achieves excellence

**THIS WORKSHOP
WILL IMMEDIATELY
EXPAND YOUR DENTAL
IMPLANT PRACTICE!**

IMPLEMENT 3D IMPLANT DENTISTRY MONDAY MORNING!

Leave this workshop with the education, experience,
and confidence on topics including:

Precision Components

Understand the precision components along with how, when, where, and why of their use.

Diagnosis

Learn the critical diagnostic keys to ensure ideal, predictable patient outcomes.

Virtual Planning

Hands-on virtual planning full arch implant cases and radiographic appliance fabrication.

NDX Guided Surgery

Learn a unique bone foundation surgical guide process that ensures accurate surgery.

Immediate Loading

Understand the requirements for immediate loading and techniques for fabricating a provisional.

Final Prosthetics

Learn modern prosthetic materials and techniques that minimize patient visit while producing aesthetic results.

2-DAY INTENSIVE HANDS-ON WORKSHOP

Medical Billing Simplified

Predictable Recipe for Getting Paid

WITH MR. HOOTAN SHAHIDI

Are you realizing the impact that billing medical insurance can have on your practice?

If you aren't billing medical insurance for your examinations, diagnostic imaging, oral appliances, bone grafting and surgical procedures — you are literally leaving thousands of dollars on the table. This workshop will give you a predictable and ethical approach to maximizing medical reimbursement.

This workshop is based on real life challenges and implemented techniques that have led to successful results with medical billing. Go beyond just the codes and learn an implementation system that actually yield payments. Detailed attention is given to the three key components of medical billing — code knowledge, proper documentation, and team administration. You will leave this workshop with confidence and understand:

1. What procedures are billable to medical
2. Applicable CPT procedure codes
3. ICD-10 diagnosis codes
4. Hands-on medical billing software
5. Team friendly implementation
6. How to determine patient eligibility
7. When preauthorization is required

This course is right for you if:

- You want to systematically implement medical billing in your 3D practice
- You want to increase your revenue for procedures you are already doing
- You want an additional resource to make it easier for patients to say yes

**WE'LL HELP FILE YOUR FIRST
5 CLAIMS DURING COURSE!**

**THIS WORKSHOP
WILL IMMEDIATELY
ADD REVENUE TO
YOUR PRACTICE**

IMPLEMENT MEDICAL BILLING MONDAY MORNING!

Leave this workshop with the education, experience,
and confidence on topics including:

Examinations

Tired of frequency limitations of dental insurance? Avoid them by billing medical insurance.

Diagnostic Imaging

Stop giving away your 3D scans and capture lost revenue through medical billing.

Oral Appliances

Assist your patients in accepting treatment they desperately need and start saving lives.

Grafting

Help patients receive reimbursement for procedures typically denied by dental insurance.

Trauma

Learn to utilize medical billing for dental procedures in trauma cases.

Your Claims

File your actual patient claims live under guidance to help recoup your workshop investment.

3-DAY INTENSIVE HANDS-ON WORKSHOP

Maximum CEREC

Unleash the Power of CEREC

WITH DR. BENJAMIN NEMEC

Are you ready to go beyond single posterior restorations & truly realize the potential of CEREC?

This three day intensive hands-on workshop is specifically geared towards the CEREC owner looking to go to another level. The goal is efficient, predictable, and aesthetic results without clinical compromise.

Through an ideal combination of lecture and extensive hands-on exercises, you will greatly expand your clinical indications for CEREC. Detailed attention is given to case planning, preparation, design techniques, milling, and finishing to achieve predictable and aesthetic results. You will leave this workshop with confidence and understand:

1. Techniques to achieve adjustment free restorations
2. Case planning various multiple restoration situations
3. The most under utilized feature in CEREC
4. Learn all biogeneric design techniques
5. Advanced preparation techniques
6. Learn indications for newer CEREC materials
7. Increasing case acceptance

This course is right for you if:

- You want a clear, concise workflow that produces efficient, excellent results
- You want to maximize the potential of your CEREC investment
- You want to dramatically expand clinical indications of CEREC

**THIS WORKSHOP WILL
EXPONENTIALLY IMPROVE
YOUR CONFIDENCE
WITH CEREC**

MASTER CEREC TECHNIQUES FOR MONDAY MORNING!

Leave this workshop with the education, experience and confidence on topics including:

Efficiency, Workflow, & Fundamentals

Mastering sequencing, materials and parameters for adjustment free single posterior restorations.

Implant Restoration

Step-by-step fabrication technique of the custom abutment and screw retained abutment crown.

CEREC Multiples

Efficient techniques for planning, milling, and placing multiple CEREC posterior restorations.

Chairside Bridges

Learn the design requirements of pontic connectors for traditional & maryland bridges.

Simple Anteriors

Learn various design and stain & glaze techniques that make single anteriors fun & predictable.

Case Forensics

Bring your own cases for evaluation & troubleshooting of common pitfalls.
